International Comparisons of Taxation in Developing Countries

2019

Keio University
Faculty of Business and Commerce
This study tries to compare economic environments, fiscal positions, tax systems, tax administration and prospects in tax reform in selected developing countries, namely, Indonesia and Egypt.

In so doing, we can identify common needs in tax reform such as tax-bare broadening, simplifying tax schedule, neutralizing tax burden, efficiency and equity improving.

At the same time, country-specific issues vary from country to country. They reflect different stages of development in respective countries.

Members of this study consists of

Yukinobu Kitamura

Introduction

This study tries to compare economic environments, technical assistance in fiscal policy and tax administration in selected developing countries; Indonesia and Egypt.

Individual country chapter shares basically the same organizational framework.

I. Introduction

II. Macroeconomic Activity

II. 1 International Environment

II. 2 Domestic Environment

II. 3 Fiscal Position

III. Tax System

IV. Country-Specific Issues

V. Summary and Conclusion

In so doing, we can compare countries on the same issues, identify similarities and differences and highlight country-specific issues.

Individual country chapter is written by a tax expert of respective country. It contains valuable statistical and policy information. Individual chapters, then, are compiled and edited by Yukinobu Kitamura.
