## Life in the Tsunashima Sustainable Smart Town

### ■ Concept

A Town That's Shaping the Future.

*Innovating the Future Together.*

The Tsunashima Sustainable Smart Town (Tsunashima SST) is a next-generation urban smart town. Companies, local governments, and citizens will cooperate and pool their knowledge in order to develop advanced technologies, human resources, and connections with local communities and enhance the brand value of the town. Let's understand the Tsunashima SST and make our life better.

### ■ Town's Overall Targets

To materialize the concept, the Tsunashima SST set numerical targets for the town.

#### 【Environmental target】

CO<sub>2</sub> emissions  
40% reduction

Community water usage  
30% reduction

Use of new energies\*1  
30% or greater

#### 【Safety target】

CCP\*  
3 days

\*The community continuity plan (CCP) is a plan for restoring the community to its normal state following the occurrence of an emergency situation

### ■ Achieving the Town's Overall Targets

#### 【Normal Times】

- Remember that you are part of the town and know and observe the targets and rules of the town.
- Explore ways to create an ecological lifestyle without sacrificing comfort. For example, use energy-saving equipment properly and turn lights off when there is no one in the room.
- The Tsunashima SST provides services for achieving smart life. Use available services and have an eco-friendly comfortable life.
  - Ex. 1) Mobility: To save energy and space, various means of mobility, such as car-sharing and electric bicycle-sharing, are available.
  - Ex. 2) Multi-signage system: Multi-signage systems allow you to check the progress made toward the targets.
- Take part in community activities and cooperate in activities to develop a favorable community.

#### 【Emergency】

- The most fundamental concept for minimizing disaster damage is to combine self-help (each individual's efforts to protect their own safety). Learn locations vulnerable to disaster damage and accident hot spots, and actively participate in emergency disaster drills.
- After you ensure your safety, share manpower, goods, and information with others who are in need of them.

### ■ The Role of international dormitory

The Tsunashima SST international dormitory is an exchange base of the Tsunashima SST. Have new experience and make an idea real through interacting with others.

# 1: Purpose

---

This Dormitory Regulations provide a set of minimum standards designed to create an environment conducive to study while ensuring that all resident students are able to live together in a spirit of goodwill and harmony.

The Rules of Conduct are designed to ensure the safety of all resident students, and Prohibitions are to create a more comfortable living environment for each and every student in the dormitory.

You will develop consideration for others through your experiences in the dormitory, which sure will benefit you in the near future when you go out into the world.
